

## WATER & ENERGY

**HOW BEST TO PROVIDE PEOPLE AND THE ECONOMY WITH CLIMATE-FRIENDLY ENERGY AND CLEAN WATER IS AN EXISTENTIAL QUESTION IN EVERY RESPECT. IN LIGHT OF SIGNIFICANTLY INCREASING WORLDWIDE DEMAND, ECOLOGICAL APPROACHES AND ECONOMICALLY EFFICIENT ACTION IS REQUIRED.**

For example by protecting natural resources through the use of renewable energy, or harnessing the power of water, which is not only essential for life but also a means of transport, in a responsible and technically sophisticated manner. The German Construction Value Chain tackles these tasks for the future with a high degree of expertise and innovative spirit. And in doing so, it promotes positive economic and ecological developments worldwide.
